DETAILED ACTION

The Group and Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Amy DeCloux, Group Art Unit 1644, Group 1640, Technology Center 1600.

Applicant's amendment and election filed 3-25-02 (Paper No. 5) in response to the restriction requirement mailed 2-14-02 (Paper No. 4) is acknowledged and has been entered. However in view of the newly amended and cancelled claims, a new restriction requirement has been set forth which replaces that mailed 2-14-02 (Paper No. 4).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to an isolated polypeptide, classified in class 435, subclass 195.
 - II. Claims 10, 30-31, 33, and 35-42, drawn to an antibody and a method of making said antibody, classified in class 530, subclass 388.85.
 - III. Claim 29, drawn to a diagnostic test, classified in class 435, subclass 7.4.
 - IV. Claims 32 and 34, drawn to a method of diagnosing a condition or disease comprising administration of a composition comprising an antibody, classified in class 424, subclass 94.6.
 - V. Claim 44, drawn to a method of purifying a polypeptide of SEQ ID NO:1 from a sample comprising an antibody, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other, because of the following reasons:

2. Inventions II and III, IV, and V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antibody, can be used in as an antigen in a method of making antibodies to the antigen binding site of the recited antibodies, as well as in the methods recited in Groups III, IV and V.

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the two different product inventions, the antibody and the protein, have different amino acid sequence with distinct biochemical structure and functions. Therefore, Groups I and II are patentably distinct

4. Inventions III, IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions comprise process steps and different endpoints. The endpoints of Groups III and IV have a common endpoint of being a method of diagnosing a disease or condition but differ in their process steps. Group V has an endpoint and process steps, distinct from those of Groups III and IV. Therefore Groups III, IV and V are patentably distinct .

5. Because these inventions are distinct for the reasons given above and the search required for each Group is not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 1644

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amy M. DeCloux whose telephone number is 703 306-5821. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on 703 308-3973. The fax phone numbers for the organization where this application or proceeding is assigned are 703 305-3014 for regular communications and 703 305-7401 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 308-0196.
